**Table 1: Text delete**

<b>Operation:</b> Delete part of <article-title> and the entire <email> content			
Tool	N. Oper.	Operations	Success
XyDiff	2+1	DELETE text from <email> tag UPDATE <article-title> text by running TEXT DELETE	1
JNDiff	3	DELETE entire <email> tag INSERT <email/> tag DELETE part of the text	1
DiffXML	3	INSERT new text node into <article-title> DELETE text from <email> tag DELETE original <article-title> text node content	0.5
jXyDiff	3	DELETE text from <email> tag DELETE <article-title> content INSERT new <article-title> content <i>INFO: Update flag used for the &lt;article-title&gt;</i>	1
fc-XMLDiff		<i>INFO: Annotations on the original XML file with diff:copy actions</i>	0
XCC	3	INSERT <email/> tag DELETE entire <email> tag UPDATE <article-title> with new value <i>INFO: Keeps old values for delete &amp; Fingerprint usage</i>	1
Node-delta	4	DELETE text from <article-title> tag INSERT new text to <article-title> tag DELETE entire <email> tag INSERT <email/> tag <i>INFO: No edits / updates, only full text replace</i>	0.5
XMLDiff	3	DELETE text from <article-title> tag INSERT <email/> tag DELETE entire <email> tag <i>INFO: Annotations on the original XML file with diff:XXX actions</i>	1
XDiff	0	<i>INFO: No change detected</i>	0
XOP		<i>INFO: Computes the subtraction between the original and new XML</i>	0
DiffMK	1	diffmk:change="changed" on the <article-title> <i>INFO: Change annotations on the new XML file, ignoring removals</i>	0
DeltaXML	2	Article title versions shown as different <email> tag content shown as different <i>INFO: Annotations on the new XML with A!=B</i>	1

**Table 2: Text delete complex**

<b>Operation:</b> Delete part of section Introduction <p> that has other child elements			
Tool	N. Oper.	Operations	Success
XyDiff	2	DELETE entire text content with no child elements INSERT entire new text	0
JNDiff	1	DELETE the removed portion of text	2
DiffXML	2	DELETE entire text content with no child elements INSERT entire new text	0
jXyDiff	2	DELETE entire text content with no child elements INSERT entire new text	0
fc-XMLDiff	1	<i>INFO: Annotations on the original XML file with diff:copy on the entire text content with no child elements</i>	0
XCC	2	DELETE entire text content with no child elements INSERT entire new text <i>INFO: Keeps old values for delete &amp; Fingerprint usage</i>	0
Node-delta	2	DELETE entire text content with no child elements INSERT entire new text	0
XMLDiff	1	DELETE text from <article-title> <i>INFO: Annotations on the original XML file with diff:delete action</i>	2
XDiff	0	<i>INFO: No change detected</i>	0
XOP		<i>INFO: Computes the subtraction between the original and new XML</i>	0
DiffMK	1	UPDATE entire text content with no child elements <i>INFO: Annotations on the new XML file with diffmk:change</i>	0
DeltaXML	1	Entire text content with no child elements shown as different <i>INFO: Annotations on the new XML with A!=B</i>	0

**Table 3: Text insert**

<b>Operation:</b> Add text content into <article-title> and <given-names>			
Tool	N. Oper.	Operations	Success
XyDiff	2x2	UPDATE of <given-names> tag Text insert of "a_test-" Text insert of "uthor_" UPDATE of <article_title> tag Text insert l "-test_tit" Text insert "e-"	0
JNDiff	3	DELETE entire <given_names> INSERT new <given_names> INSERT new text value in the existing <article_title>	1
DiffXML	4	DELETE entire <article_title> INSERT new < article_title> DELETE entire <given_names> INSERT new <given_names>	0.5
jXyDiff	4	DELETE <given_names> text content with update="yes" attribute DELETE <article_title> text content with update="yes" attribute INSERT <given_names> new text content with update="yes" attribute INSERT <given_names> new text content with update="yes" attribute	1
fc-XMLDiff	7	<i>INFO: Annotations on the original XML file with diff:copy</i>	0
XCC	2	UPDATE <article-title> UPDATE <given_names> <i>INFO: Keeps old values for update &amp; Fingerprint usage</i> <i>The entire text nodes are replaced, however with the presence of the old and new values, we could compute the text diff</i>	1
Node-delta	4	DELETE entire <article_title> text content INSERT new <article_title> text content DELETE entire <given_names> text content INSERT new <given_names> text content	0.5
XMLDiff	2	INSERT text in <article-title> INSERT text in <given_names> <i>INFO: Annotations on the original XML file with diff:insert actions</i>	1
XDiff	0	<i>INFO: No change detected</i>	0
XOP		<i>INFO: Computes the subtraction between the original and new XML</i>	0
DiffMK	2	UPDATE <article-title> with the new value UPDATE <given_names> with the new value <i>INFO: Annotations on the new XML file with diffmk:change</i>	0.5
DeltaXML	2	<article-title> versions shown as different <given_names> versions shown as different <i>INFO: Annotations on the new XML with A!=B</i>	1

**Table 4: Text insert complex**

<b>Operation:</b> Insert text in section Introduction <p> that has other child elements			
Tool	N. Oper.	Operations	Success
XyDiff	2	DELETE entire text content with no child elements INSERT entire new text	0
JNDiff	1	INSERT new text	2
DiffXML	2	INSERT entire new text DELETE entire text content with no child elements	0
jXyDiff	2	DELETE entire text content with no child elements INSERT entire new text	0
fc-XMLDiff	3	<i>INFO: Annotations on the original XML file with diff:copy The entire text node with no child elements is shown as changed</i>	0
XCC	2	DELETE entire text content with no child elements INSERT entire new text <i>INFO: Keeps old values for update &amp; Fingerprint usage The entire text nodes are replaced, however with the presence of the old and new values, we could compute the text diff</i>	0
Node-delta	2	DELETE entire text content with no child elements INSERT entire new text	0
XMLDiff	1	INSERT new text <i>INFO: Annotations on the original XML file with diff:insert actions</i>	2
XDiff	0	<i>INFO: No change detected</i>	0
XOP		<i>INFO: Computes the subtraction between the original and new XML</i>	0
DiffMK	1	UPDATE the entire text node with no child elements <i>INFO: Annotations on the new XML file with diffmk:change</i>	0
DeltaXML	1	Entire text content with no child elements shown as different <i>INFO: Annotations on the new XML with A!=B</i>	0

**Table 5: Text move**

<b>Operation:</b> Change order in authors' <surname>			
Tool	N. Oper.	Operations	Success
XyDiff	1x3	UPDATE the text node INSERT "Oscaro " DELETE part of Manfreda //5 chars DELETE part of original Oscaro //2 chars	0
JNDiff	2	DELETE entire <surname> text content INSERT new <surname> text content	0
DiffXML	2	INSERT new <surname> text content DELETE entire <surname> text content	0
jXyDiff	2	DELETE entire <surname> text content INSERT new <surname> text content <i>INFO: Actions performed with update="yes" attribute</i>	0
fc-XMLDiff	6	<i>INFO: Annotations on the original XML file with diff:copy</i> <i>The entire text node is shown as changed</i>	0
XCC	1	UPDATE <surname> <i>INFO: Keeps old values for update &amp; Fingerprint usage</i> <i>The entire text nodes are replaced, however with the presence of the old and new values, we could compute the text diff</i>	0
Node-delta	2	DELETE entire <surname> text content INSERT new <surname> text content	0
XMLDiff	1	INSERT "Oscaro " DELETE "Oscaro" <i>INFO: Annotations on the original XML file with diff:insert and diff:delete actions</i>	0
XDiff	0	<i>INFO: No change detected</i>	0
XOP		<i>INFO: Computes the subtraction between the original and new XML</i>	0
DiffMK	1	UPDATE the entire text node <i>INFO: Annotations on the new XML file with diffmk:change</i>	0
DeltaXML	1	<surname> versions shown as different <i>INFO: Annotations on the new XML with A!=B</i>	0

**Table 6: Text update**

<b>Operation:</b> Remove one letter from the article title			
Tool	N. Oper.	Operations	Success
XyDiff	1x1	UPDATE the text node DELETE one character <i>INFO: No information about the content changed</i>	0.5
JNDiff	2	DELETE the original word INSERT the new modified word <i>INFO: No information about the node where the change is taking place</i>	0.5
DiffXML	2	INSERT new <article-title> text content DELETE entire <article-title> text content	0
jXyDiff	2	DELETE entire <article-title> text content INSERT new <article-title> text content <i>INFO: Actions performed with update="yes" attribute</i>	0.5
fc-XMLDiff	3	<i>INFO: Annotations on the original XML file with diff:copy</i> <i>The entire text node is shown as changed</i>	0
XCC	1	UPDATE <article-title> <i>INFO: Keeps old values for update &amp; Fingerprint usage</i> <i>The entire text nodes are replaced, however with the presence of the old and new values, we could compute the text diff</i>	0.5
Node-delta	2	DELETE entire <article-title> text content INSERT new <article-title> text content	0
XMLDiff	1	DELETE "s" <i>INFO: Annotations on the original XML file with diff:delete action</i>	1
XDiff	0	<i>INFO: No change detected</i>	0
XOP		<i>INFO: Computes the subtraction between the original and new XML</i>	0

DeltaXML	1	<article-title> versions shown as different <i>INFO: Annotations on the new XML with A!=B</i>	0

**Table 7: Text edit style**

<b>Operation:</b> Extend the range of the italic style in the article title		
Tool	N. Oper.	Operations
XyDiff	3	DELETE new styled part with the next character UPDATE-INSERT the deleted next character INSERT the deleted new styled part
JNDiff	3	DELETE new styled part with the next character INSERT the deleted next character INSERT the deleted new styled part with the next character
DiffXML	4	INSERT the next character of the new styled part INSERT entire new styled part DELETE entire old styled part DELETE next character of the new styled part
jXyDiff	4	DELETE new styled part with the next character DELETE the entire old styled part INSERT the entire new styled part INSERT the deleted styled part next character <i>update="yes" flag used for the styled part Delete-Insert</i>
fc-XMLDiff	7	<i>INFO: Annotations on the original XML file with diff:copy</i>
XCC	2	UPDATE the styled part UPDATE the old non styled part with the next character <i>INFO: Keeps old values for delete &amp; Fingerprint usage</i>
Node-delta	4	DELETE entire styled text content INSERT entire new styled text content DELETE the old non styled part with the next character INSERT the old non styled part next character
XMLDiff	2	INSERT the new styled part into the styling node DELETE the new styled part from its original position <i>INFO: Annotations on the original XML file with diff:delete and diff:insert</i>
XDiff	0	<i>INFO: No change detected</i>
XOP		<i>INFO: Computes the subtraction between the original and new XML</i>
DiffMK	2	Change of the styled part Change of the non styled part <i>INFO: Annotations on the new XML file with diffmk:change</i>
DeltaXML	1	Entire text content with no child elements shown as different <i>INFO: Annotations on the new XML with A!=B</i>

**Table 8: Tree delete**

<b>Operation:</b> Remove the first author with all its children			
Tool	N. Oper.	Operations	Success
XyDiff	1	DELETE the <contrib> node with all its children	1
JNDiff	1	DELETE the <contrib> node with all its children	1
DiffXML	36	11 MOVE 24 DELETE	0
jXyDiff	2	DELETE empty line DELETE the <contrib> with all its children	0.5
fc-XMLDiff	7	<i>INFO: Annotations on the original XML file with diff:copy</i>	0
XCC	5	2 x DELETE 3 x UPDATE <i>INFO: Keeps old values for update &amp; Fingerprint usage</i>	0
Node-delta	1	DELETE the <contrib> with all its children	1
XMLDiff	65	Plenty of diff:rename, diff:insert, diff:delete <i>INFO: Annotations on the original XML file with diff:insert and diff:delete actions</i>	0
XDiff	1	DELETE the <contrib> with all its children <i>INFO: The modified XML tree structure is annotated: DELETE node added</i>	1
XOP		<i>INFO: Computes the subtraction between the original and new XML</i>	0
DiffMK	0	<i>INFO: Annotations on the new XML file with diffmk:change</i> <i>No info on the removed node</i>	0
DeltaXML	1	<contrib> with all its children shown as different <i>INFO: Annotations on the new XML with A!=B</i>	1

**Table 9: Tree delete complex**

<b>Operation:</b> Remove one <xref> from section Introduction <p> that has other child elements			
Tool	N. Oper.	Operations	Success
XyDiff	6	4 x DELETE 2 x INSERT	0
JNDiff	3	DELETE <xref> node DELETE comma INSERT comma	1
DiffXML	6	1 MOVE 1 INSERT 4 DELETE	0
jXyDiff	6	4 x DELETE 2 x INSERT	0
fc-XMLDiff	3	<i>INFO: Annotations on the original XML file with diff:copy</i>	0
XCC	2	DELETE xref node and comma UPDATE the text to add back the comma <i>INFO: Keeps old values for update &amp; Fingerprint usage</i>	1
Node-delta	2	DELETE text with xref INSERT text without xref	0
XMLDiff	14	6 x INSERT 5 x DELETE 3 x UPDATE ATTRIBUTE <i>INFO: Annotations on the original XML file with diff:insert and diff:delete actions</i>	0
XDifff	1	DELETE the <xref> node <i>INFO: The modified XML tree structure is annotated: DELETE node added</i>	2
XOP		<i>INFO: Computes the subtraction between the original and new XML</i>	0
DiffMK	1	<i>INFO: Annotations on the new XML file with diffmk:change</i> <i>The entire parent text node is shown as changed, no info about the child node removal</i>	0
DeltaXML	1	The entire text node is shown as different <i>INFO: Annotations on the new XML with A!=B</i>	0

**Table 10: Tree insert**

<b>Operation: Insert an additional author</b>			
Tool	N. Oper.	Operations	Success
XyDiff	1	INSERT <contrib> node with all its children	1
JNDiff	6	EXTRACT <contrib> node ADD <contrib> node INSERT <xref> node ADD <contrib> node INSERT <contrib-id> node INSERT <name> node with its children	0.5
DiffXML	36	13 MOVE 23 INSERT	0
